

Robina Private Hospital day surgery suite a hidden gem on the central Gold Coast

Since opening in December 2017 the purpose built modern day procedures suite at Robina Private Hospital continues to establish itself as a local service of choice for the Gold Coast community.

A number of highly skilled specialists operate in the day procedures suite, performing endoscopy, interventional pain procedures, oral maxillofacial and orthopaedic surgery.

Hospital CEO, Claire Thurwood confirms the unit is equipped with the latest Olympus endoscopy equipment and is staffed by experienced nursing and technical staff, supported by the other services provided at the hospital.

“Robina Private Hospital offers the best possible environment for patients to have surgery, without having to stay in hospital overnight, in a great central location on the Gold Coast.

“Our endoscopy services have proven to be especially popular with fast access and our low out of pocket costs for uninsured patients leading to strong demand for this service”, Claire says.

There are currently three specialist gastroenterologists providing consulting and endoscopy services from Robina Private Hospital, with all health funds accepted and self-funded patients welcome.

The success of the day procedures suite has instilled confidence in Stage 2 plans for the proposed further development of six new acute operating theatres, a cardiac catheterisation laboratory, and intensive and coronary care units at Robina Private Hospital expected to commence construction in late 2019.

For further information or to arrange a referral, please contact Robina Private Hospital on 07 5665 5100.
